

We at Carollo are passionate about teaching young people that science and technology is in everything we do, every day.

We advocate for investing time and resources in STEAM education as one of the most effective ways to build a secure socio-economic environment for everyone.

We feel that it is everyone's job — not just teachers — to spark a sustained level of excitement for science and engineering in the minds of young people.

We subscribe to the principles of selflessly giving back to youth as a way to ensure our community's growth potential and quality of life.

We lead by example in developing partnerships and initiatives that will advance this cause and compel our youth to become engaged in their communities.

The Carollo Cares Program is our commitment to helping our clients and communities educate students and young people about water-related issues, with the hope of encouraging future generations to implement solutions that strengthen the resiliency of our environment and water supplies.

ENGINEERING UNIT PRESENTATION

Carollo visited first graders at Anne Fox Elementary School in Hanover Park, Illinois

during their engineering unit to talk about environmental engineering. Students learned about what engineers do, where their water comes from, what happens after they use their water, and how they can use problem solving skills to make an impact as an engineer.

ENVIRONMENTAL SCIENCE CLUB

Carollo staff returned to Anne Fox Elementary School to perform some hands-on water experiments with students in the after-school Environmental Science Club.

Fifth graders performed experiments illustrating the differences in pervious and impervious areas, simulated groundwater pump stations and aquifer recharge, and built small sand filters. Students also learned about the requirements to become an engineer and the different types of projects that environmental engineers work on.

LOOKING FORWARD WITH CAROLLO CARES

Water is our most valuable resource - it sustains life, maintains healthy ecosystems, and supports thriving communities. Carollo is committed to continued involvement

in STEAM and the education of our local youth about the importance of clean water systems and their impact on the environment.

In the future, Carollo will continue to explore opportunities where we can inspire our youth and add value in our communities.
