

*We at Carollo are passionate about teaching young people that science and technology is in everything we do, every day.*

*We advocate for investing time and resources in **STEAM** education as one of the most effective ways to build a secure socio-economic environment for everyone.*

*We feel that it is everyone's job — not just teachers — to spark a sustained level of excitement for science and engineering in the minds of young people.*

*We subscribe to the principles of selflessly giving back to youth as a way to ensure our community's growth potential and quality of life.*

*We lead by example in developing partnerships and initiatives that will advance this cause and compel our youth to become engaged in their communities.*

The Carollo Cares Program is our commitment to helping our clients and communities educate students and young people about water-related issues, with the hope of encouraging future generations to implement solutions that strengthen the resiliency of our environment and water supplies.

### JOB SHADOW DAY

Carollo partnered with the City of Peoria Unified School District (PUSD) MET Professional Academy, which is designed to motivate students by treating them as working professionals and preparing them for post-secondary education and careers in high demand STEM fields. Students are immersed in a professional setting and gain valuable experience working with industry professionals who help them learn through authentic projects and work experiences.

Four seniors spent an entire day with Carollo Engineers, gaining hands-on experience in water related projects and skills such as critical thinking, project management, and problem solving.

### FUTURE CITY COMPETITION

Carollo provided engineering judges, mentors, and program oversight for the Future City Competition Arizona Regional Finals. This national STEM program introduces middle school aged students to science and engineering concepts related to water resources, transportation, energy, and city planning as they design and build their vision for an urban world of tomorrow.

## MCKINLEY COUNTY WATER AND ENERGY AWARENESS DAY

Carollo staff participated in the McKinley County Water and Energy Awareness Day event, where they engaged with over 300 4th and 5th graders with a "brains on" Surface Water Treatment experiment and a "hands on" sand filter demonstration.

## GILBERT ROTARY CLUB NAVAJO WATER PROJECT

Carollo contributed to the efforts of the Town of Gilbert Rotary Club's water project for Navajo families in New Mexico. This water cistern and plumbing project transformed the lives of 18 Navajo families by providing running water into their homes for the very first time. Previously, they had to haul water for daily use.

## LOOKING FORWARD WITH CAROLLO CARES

Water is our most valuable resource - it sustains life, maintains healthy ecosystems, and supports thriving communities. Carollo is committed to continued involvement in STEAM and the education of our local youth about the importance of clean water systems and their impact on the environment.

In the future, Carollo will continue to explore opportunities where we can inspire our youth and add value in our communities.

**Carollo Cares** is part of Carollo's corporate commitment to giving back to the areas we serve. Through this program, we can be responsive to each community's unique needs, benefit our employees, and provide educational opportunities that align with our mission of Working Wonders with Water®!
