

*Dedicated to enriching STEAM education in* **ORANGE COUNTY**

We at Carollo are passionate about teaching young people that science and technology is in everything we do, every day.

We advocate for investing time and resources in **STEAM** education as one of the most effective ways to build a secure socio-economic environment for everyone.

We feel that it is everyone's job—not just teachers—to spark a sustained level of excitement for science and engineering in the minds of young people.

We subscribe to the principles of selflessly giving back to youth as a way to ensure our community's growth potential and quality of life.

We lead by example in developing partnerships and initiatives that will advance this cause and compel our youth to become engaged in their communities.

## OC YOUTH ENVIRONMENTAL SUMMIT (YES)

Carollo supports the mission of YES to educate Orange County students about water-related and environmental issues that support Next Generation Science Standards. Through interactive and engaging sessions, YES teaches youth that they can make a difference in protecting our resources today, tomorrow and for future generations. In 2021, Carollo created a virtual presentation to support the event's online format. Carollo will participate in the 2022 event which is being planned as an in-person field trip and is expected to attract more than 7,000 third, fourth and fifth grade teachers and students.

## CHILDREN'S WATER EDUCATION FESTIVAL

Carollo participates in the annual Children's Water Education Festival, the largest of its kind in the United States, at the University of California, Irvine. The award-winning event is presented by the Orange County Water District (OCWD), Disneyland Resort, National Water Research Institute and the Orange County Water District Groundwater Guardian Team.

## ELEMENTARY SCHOOL VISITS

Carollo Engineers continues its commitment to support local educators with collaboration in the classroom. These on-site visits by our engineers provide a venue for students, educators, and professionals to demonstrate programs, projects and practices in an effort to enrich STEM education. Our program at Van Buren Elementary School includes lessons and hands-on activities to teach students about water and wastewater treatment, the water cycle, and water conservation. We strive to inspire students to become innovative and creative thinkers by fostering excitement and interest in the fields of science, technology and engineering.

## SEGERSTROM HIGH SCHOOL SENIOR EXIT INTERVIEWS

Carollo Engineers participates in the annual Senior Exit Interview program. Future graduates share their career goals, research on their chosen career, and a job shadow that they completed. Carollo's engineers assess students' interview skills as they talk about their experiences with the job shadow.

## LOOKING FORWARD WITH CAROLLO CARES

Water is our most valuable resource - it sustains life, maintains healthy ecosystems, and supports thriving communities. Carollo is committed to continued involvement in STEAM and the education of our local youth about the importance of clean water systems and their impact on the environment.

In the future, Carollo will continue to explore opportunities where we can inspire our youth and add value in our communities.

*Children's Water Education Festival.*

***Carollo Cares** is part of Carollo's corporate commitment to giving back to the areas we serve. Through this program, we can be responsive to each community's unique needs, benefit our employees, and provide educational opportunities that align with our mission of Working Wonders with Water®!*
