

## Envision™ Sustainability Rating System Assessments

In addition to a wide range of other sustainability and resilience services, Carollo has expansive experience applying the Envision™ Rating System to evaluate sustainability and improvement metrics on a range of projects.

**Institute for  
Sustainable  
Infrastructure**

## Provides practical guidance for designing systems holistically

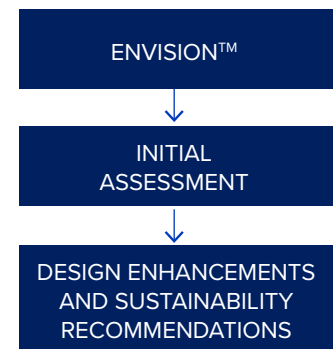

Carollo can use the Institute for Sustainable Infrastructure's (ISI) Envision™ Rating System to assess the sustainability for any water infrastructure project. Carollo can lead the pursuit of an Envision™ certification and verification process for the project to achieve an Envision™ award. Carollo can also utilize the Envision™ Rating System to provide an initial assessment, which includes a preliminary award level and identification of design enhancements and coordination across internal departments to improve the overall sustainability.

With the use of Envision™, Carollo can help teams:

- Meet sustainability goals.
- Be publicly recognized for high levels of sustainable achievement.
- Collaborate with communities and answer questions such as, "Are we doing the right project?" and "Are we doing the project right?"
- Make decisions about the investment of scarce resources.
- Include community priorities in water infrastructure projects.

### PURSUIT FOR VERIFICATION

#### INITIAL ASSESSMENT ONLY

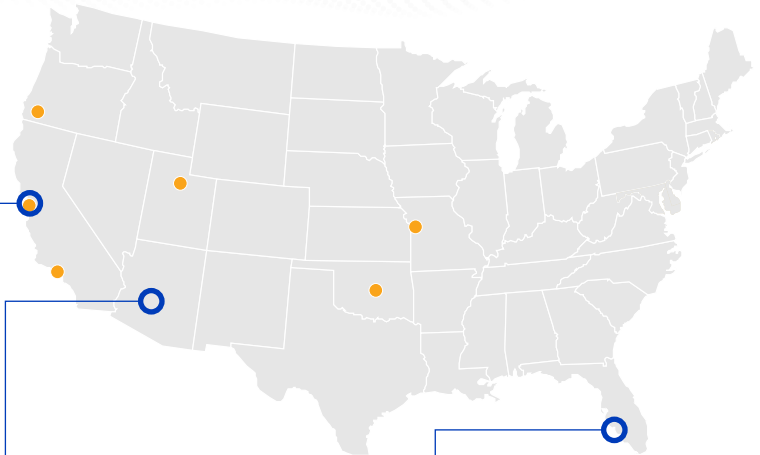

PURSUIT OF ENVISION™  
CERTIFICATION  
AND VERIFICATION

ENVISION™  
SUSTAINABILITY AWARD  
FROM ISI

**San Francisco Public Utilities Commission, CA**  
**Southeast Plant 250-mgd Headworks Facility**  
*San Francisco, California*

- Carollo applied the Envision™ Rating System, leading the certification and verification processes, to help the project achieve a Gold Award.

**City of Phoenix, Verde Water Treatment Plant**  
**Facilities Demolition Project**  
*Phoenix, Arizona*

- Carollo prepared the verification package for this project that earned an Envision™ Platinum Award. This decommissioned water plant was restored to a natural, pre-development condition. This was the first demolition project to earn recognition from the Institute for Sustainable Infrastructure.

**Bee Ridge Water Reclamation Facility (WRF)**  
**Expansion**  
*Sarasota County, Florida*

- Carollo led sustainability practices throughout the design and will complete the necessary follow-up assessments during construction. This project is pursuing an Envision™ Silver Award.

## Carollo has applied the Envision™ Rating System's Initial Assessment to improve the overall sustainability of the following projects:

- City of Edmond, OK / Arcadia WTF Expansion
- City of Grants Pass, OR / Pump Replacement Project
- Kansas City, MO / Sewer Separation/ GI Project
- City of Oxnard, CA / Integrated Master Plan
- Salt Lake City, UT / Water Intake Replacement Project
- San Francisco PUC, CA / Treasure Island WWTP
